

Smart School App

The complete offline learning and school management suite for Primary 1 to Primary 6.

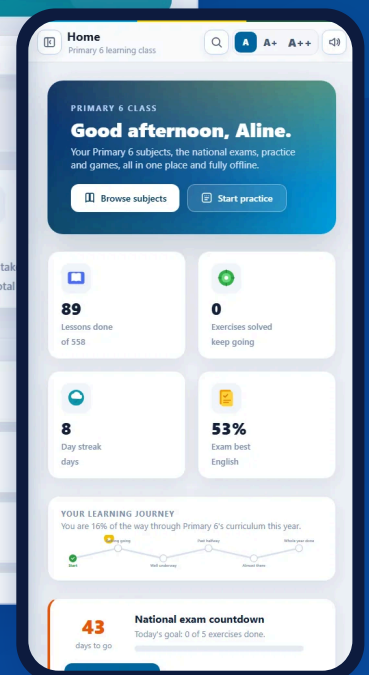

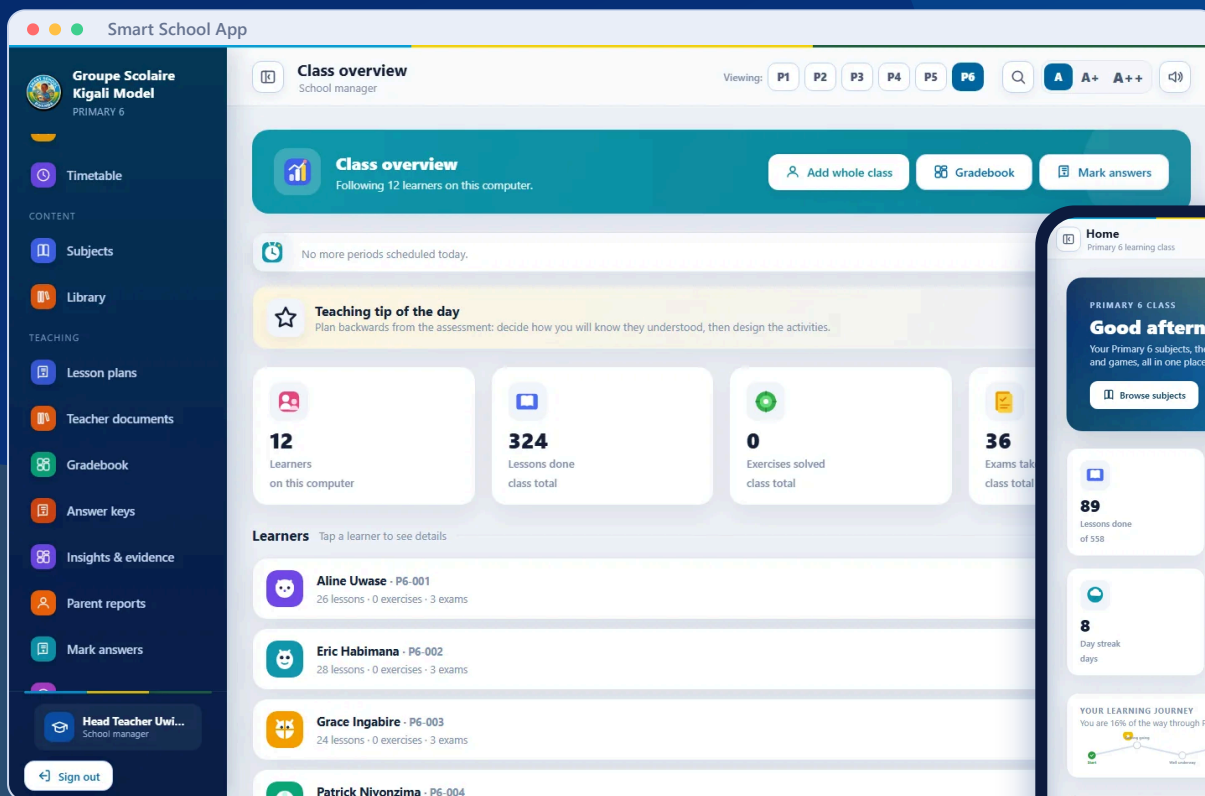

Windows

Android

Works without internet

English, French, Kinyarwanda

62

national exam papers, 2010 to 2025

3

kinds of user, one app

0

internet needed to teach

AT A GLANCE

One app for the whole school

Learners study and practise. Teachers plan, mark and report. Managers see how the school is doing. Everything runs on the school's own devices, with or without a connection.

Learners

The full curriculum library, practice, quizzes, games and past papers, with read aloud and larger text.

Teachers

Lesson plans, timetables, marking, homework, a gradebook and printable reports for parents.

School managers

Staff profiles, class and subject access, insights, backups and sync between devices.

Built for schools with unreliable internet

If it needs the internet to teach a lesson, it is not finished. Records stay on the school's computers and phones. Online features are optional and switched on by the school.

100%
of lessons work offline

HOW IT FITS TOGETHER

Windows

Computers for the office, the lab and the head teacher.

Android

Phones and tablets for teachers and learners at home.

School sync

Devices share records over the school Wi-Fi or a phone hotspot.

Cloud, optional

Browser access and sync between distant devices.

P1 to P6

every class and subject

3

languages for lesson plans

2 GB

library included, no downloads later

A typical day with Smart School App

1

Morning

The teacher opens today's lesson plan and the teaching guide beside the book page.

2

In class

Learners read, practise and answer on the school's devices. No signal needed.

3

After class

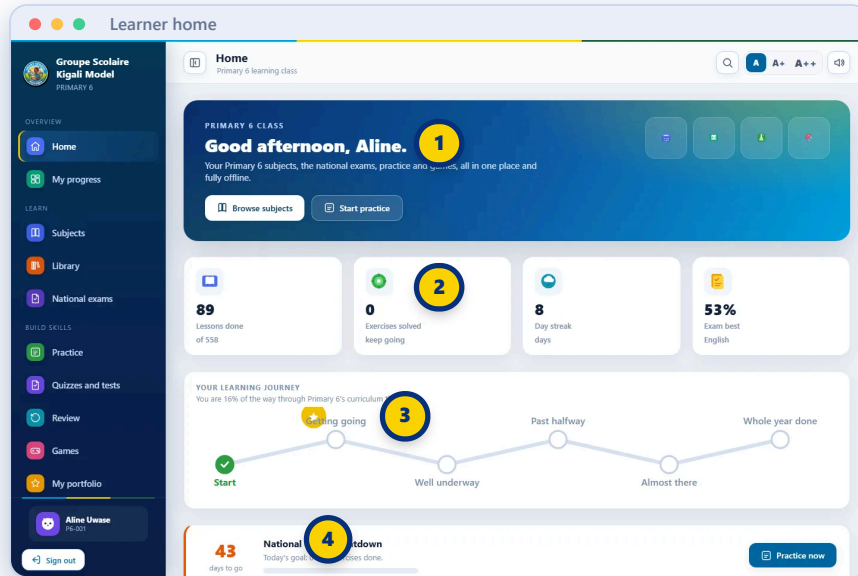

Answers are marked with the model answer beside them, and homework is set.

Every result can be changed. Timetables, plans and marks are suggestions the teacher can review and edit. The software saves time; it does not replace judgement.

FOR LEARNERS

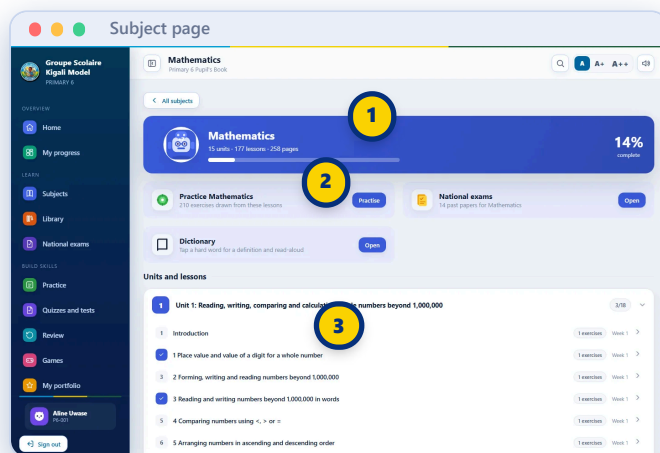

Learn at their own pace, on any device

A learner signs in to a personal profile and sees only what fits their class. Every screen is designed for children and works with large text.

- 1 Daily welcome.** Progress, streak and a clear next step.
- 2 Your numbers.** Lessons done, exercises solved, day streak, exam form.
- 3 Learning journey.** How far the learner is through the year.
- 4 Exam countdown.** Days left and a practice button.

The learner home. Real screen from the Windows version.

- 1 Progress at the top.** Units and lessons completed for the subject.
- 2 Practice and national exams.** One tap to exercises or past papers for that subject.
- 3 Units and lessons.** Open any lesson, tick it off when done.

Pupil books

Every class and subject, page by page.

Smart Practice

Brings back the topics a learner keeps missing.

Read aloud

Listen to any page.

Three text sizes

Larger text and zoom.

Games and quizzes

Timed tests with instant feedback.

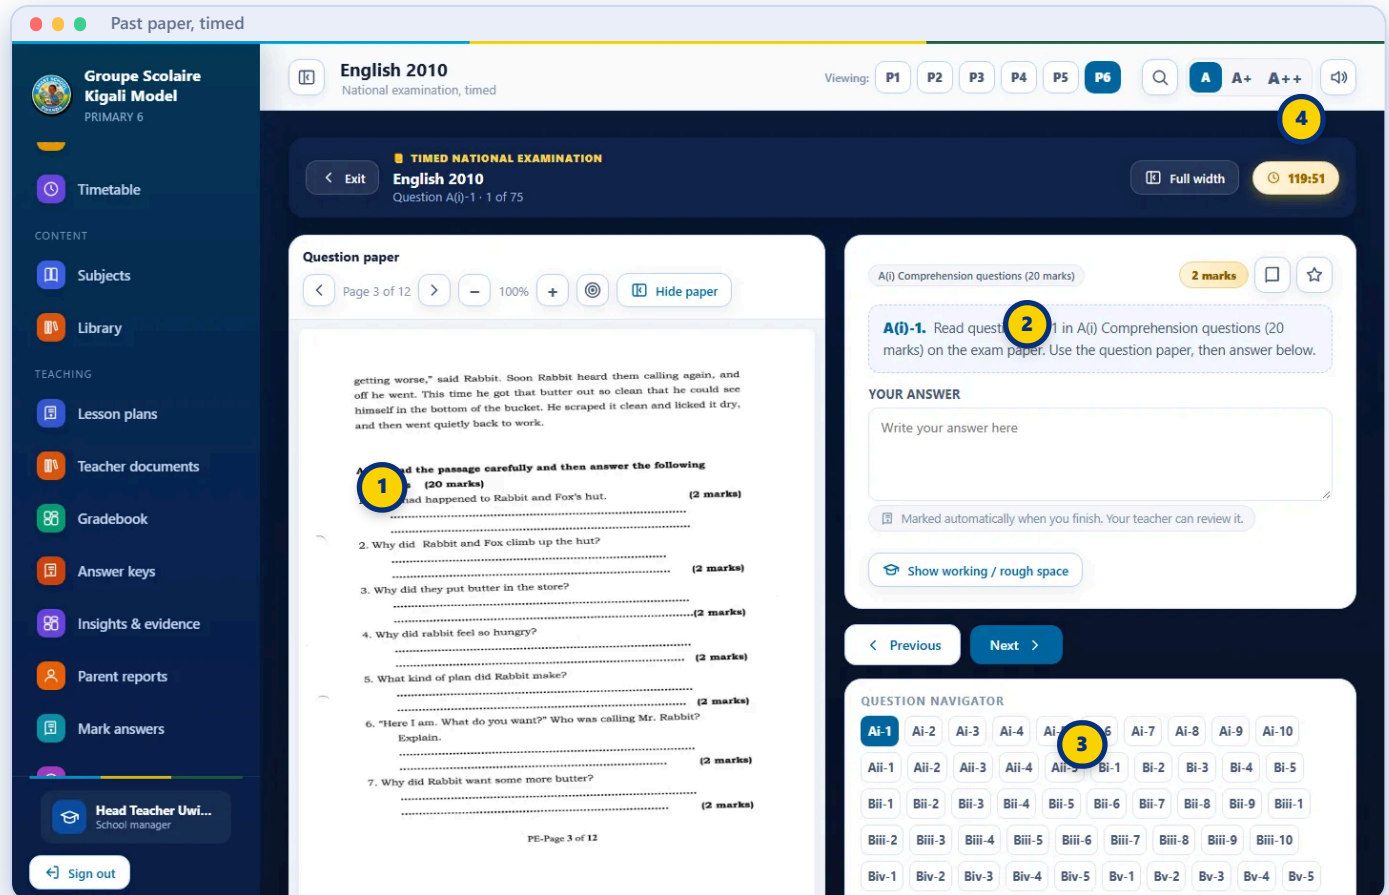

Accessible themes

Colours and layouts for easier reading.

LEARN AND PRACTISE

Past papers and national exams, the way exams really look

Sixty two past papers from 2010 to 2025 with the question pages, a timer and a review of every answer.

A timed national exam paper. The learner reads the paper on the left and writes the answer on the right.

- 1 **Question paper.** The real question pages, with zoom and page turning.
- 2 **Your answer.** Written answers are saved as the learner types.
- 3 **Question navigator.** Jump to any question and see which are answered.
- 4 **Timer.** Shows the time left, as in the real exam.

Timed and untimed

Practice calmly, or simulate the exam.

Marked against answer keys

Written answers are compared with the confirmed answer key.

Review every answer

See what was right, what was wrong and why.

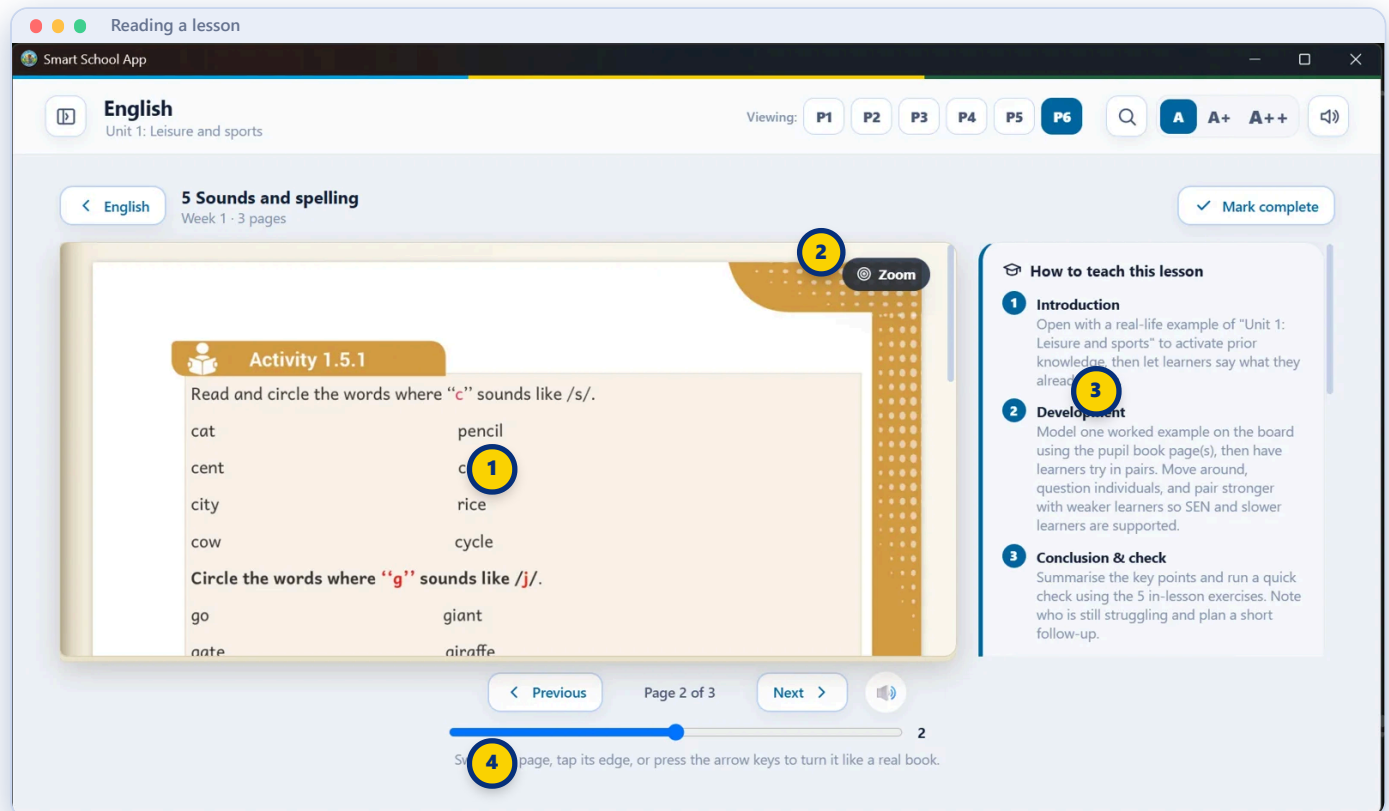

Worksheets and class tests

Teachers print or set them from the same questions.

READ AND LEARN

Pupil books with a teaching guide beside every lesson

The learner reads the real book page. The teacher sees a step by step guide for the same lesson.

Reader with the teacher's guide open on the right.

- 1 **The book page.** Clear, large, in the learner's own language.
- 2 **Zoom.** Fill the screen for a class or a small phone.
- 3 **How to teach this lesson.** Introduction, development, conclusion and check.
- 4 **Page turning.** Swipe, tap the arrows or use the keyboard.

For teachers. The guide beside each lesson suggests how to open it, what to demonstrate, and how to check understanding. It saves planning time and supports newer teachers.

Whole library

Books and exams for every class, offline.

Notes and marking

Learners keep their own work.

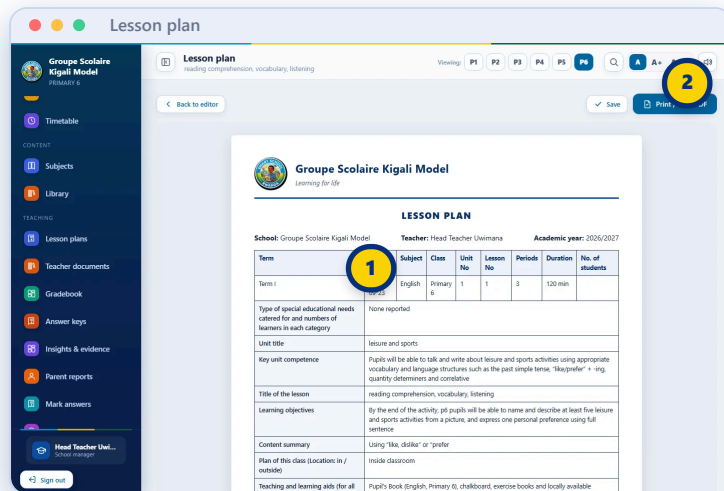

Every class and subject is included

The full library ships inside the app, so there is nothing to download later and no data cost for learners.

FOR TEACHERS

Plan, timetable and grade in minutes

The tools teachers spend evenings on, done for them and always open to review and change.

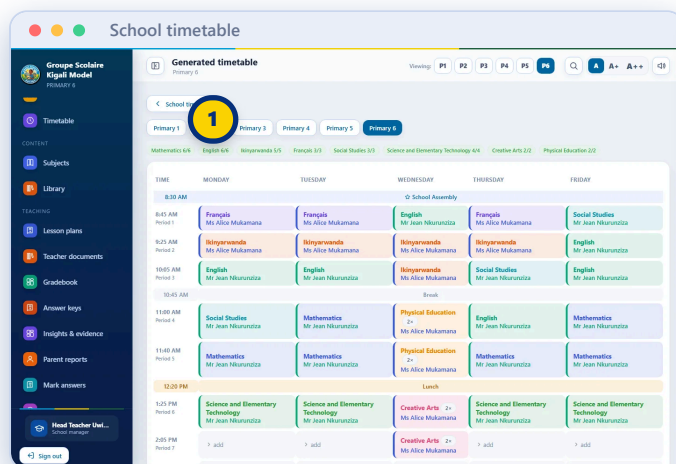

Lesson plans

- Uses the official REB template
- Filled from the real scheme of work
- English, French or Kinyarwanda
- Whole unit at once, with minutes per stage
- Print or save as PDF

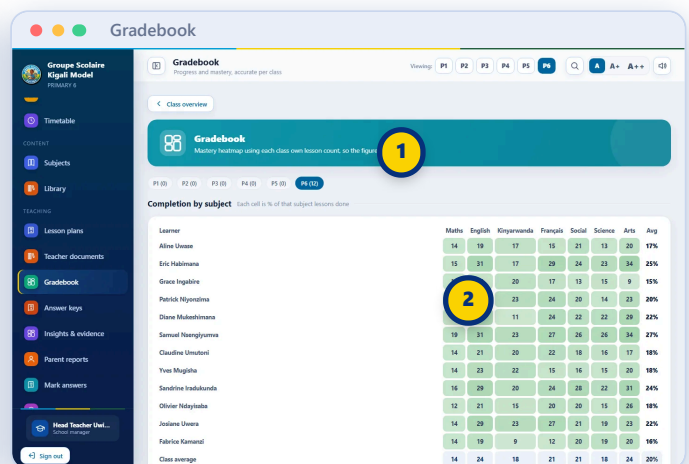

Homework and worksheets

- Set homework from any unit or quiz
- Follow who has finished
- Printable worksheets and class tests

REB lesson plan, filled from the scheme of work.

Conflict free timetable, one click.

Mastery heatmap for a whole class.

Timetable generator

Double periods, morning or afternoon preferences, no clashes.

Gradebook

Quizzes, exams and homework in one grid.

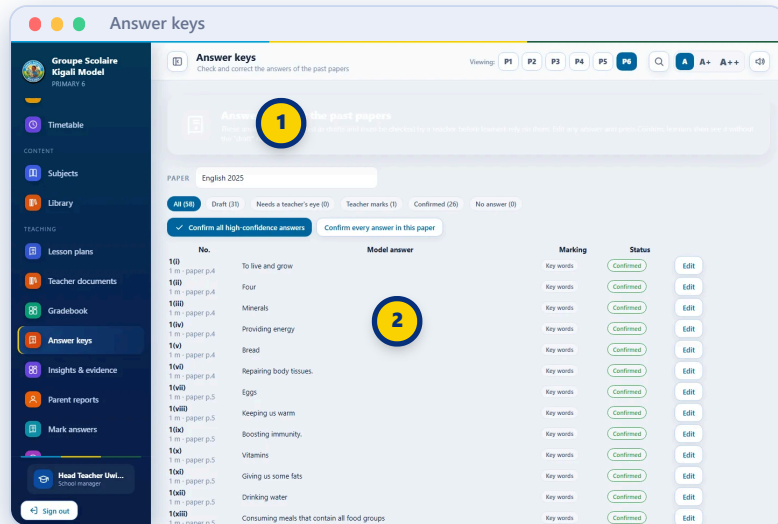

Teacher coaching

Prompts that show which topics need re-teaching.

MARKING AND FAMILIES

Mark with the answer beside the work, and keep parents informed

Teachers review answers quickly, and parents receive a clear report, even without internet.

- 1 **Filters.** Show only unconfirmed answers, or all of them.
- 2 **Model answers.** Confirm each one once and marking becomes automatic.

Marking

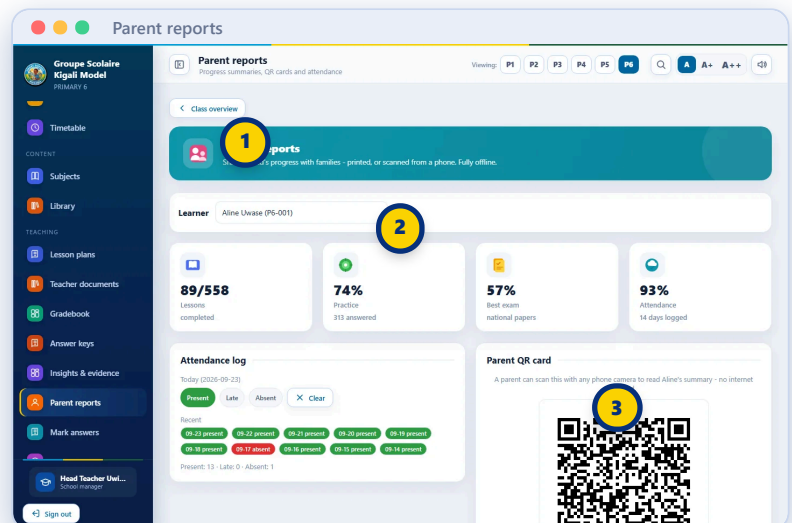

- Written answers appear with the model answer beside them
- Optional voice comments for the learner
- Written exam answers are compared with the confirmed key

Answer keys for the past papers. The teacher reviews, edits and confirms.

- 1 **Learner and class.** Pick the child and see progress at a glance.
- 2 **Numbers parents understand.** Lessons, practice, exam form and attendance.
- 3 **QR code.** A parent scans it with any phone camera and reads the summary, offline.

Reports

- Printable learner reports
- Attendance log for the school day
- Insights and an impact report for partners

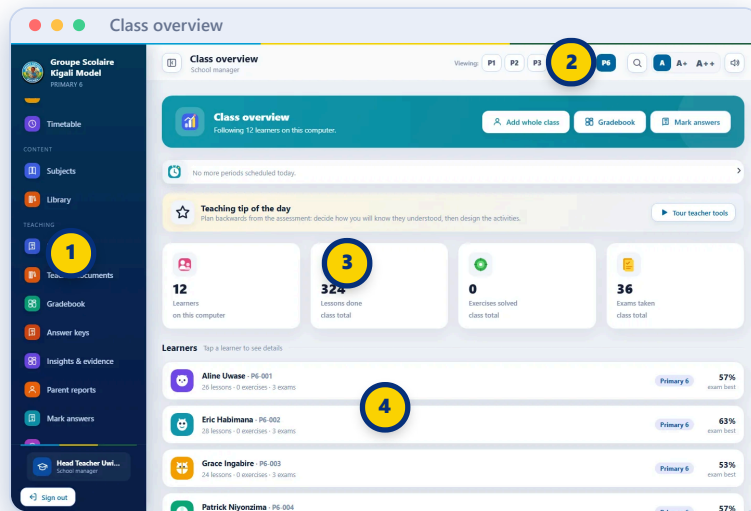

Parent report with attendance and an offline QR code.

No internet for parents either. The QR code holds the summary itself, so a parent can read it on any phone without a connection or an account.

FOR SCHOOL MANAGERS

See the whole school, control who sees what

Four roles keep things simple. Each profile sees only the classes and subjects it should.

- 1 **Menu by role.** Only the tools each person needs.
- 2 **Class selector.** Switch between P1 and P6 at any time.
- 3 **At a glance.** Learners, lessons done, exams taken.
- 4 **Learners.** Open any learner to see their progress.

Class overview for a teacher or manager.

Four roles

Role	Sees	Can do
Learner	Their own class and work	Study, practise, take exams
Subject teacher	Their subjects and classes	Plan, set homework, mark
Class teacher	Their whole class	Reports, attendance, parents
School manager	The whole school	Staff, timetable, insights, backups

Backups

USB auto backup and whole school export, so nothing is lost.

Sync on the school network

Devices share records over the school Wi-Fi or a hotspot.

Private by design

Records stay on school devices. Cloud is optional.

Evidence, not guesses

Insights show which topics are hardest, how learners are progressing and whether teachers are using the tools. An impact report turns it into pages a partner or district officer can read.

- Hardest questions
- Weak topics by class
- Progress by gender
- Impact report

GET STARTED

Installed and teaching in an afternoon

We help with the first set up, then your teachers take it from there.

1

Request a demo

We show the app with your class and subjects.

2

Install

Windows installer or Android app. No internet needed.

3

Set up staff

Create profiles, classes and subjects.

4

Teach

Plan, practise, mark and report.

Requirements

	Windows	Android
System	Windows 10 or 11, 64 bit	Android 7.0 or newer
Storage	About 2 GB	About 2 GB
Internet	Not needed	Not needed
Sync	School network, optional cloud	School network, optional cloud

Licences and support

- Licensed per school, with clear dates
- The apps keep working offline if a licence ends
- Training for teachers and school leaders
- A support desk for licensed schools
- Updates and teaching guides

Questions we hear often

Do we need internet at school?

No. Every lesson, exercise and exam works offline. The internet is only used if you choose the optional cloud.

Can teachers change the plans?

Yes. Lesson plans, timetables and marks are suggestions. Everything can be reviewed and edited.

What if a computer is lost?

Records are backed up to USB and can be restored. With sync on, other devices hold the same records.

Who sees learner data?

Only people signed in with a role that allows it. Records stay on the school's devices.

Ready to see it in your school?

Ask for a demo, a quote or a trial. We reply within two working days.
