

Smart School Cloud

Browser access and safe sync for every device in your school.

What it is

The online side of Smart School App. Open the app in any browser, and keep records in step across Windows computers and Android phones whenever there is a connection. Offline use never stops working.

Web app

- Sign in from any browser
- No installation
- Roles limit what people see

Device sync

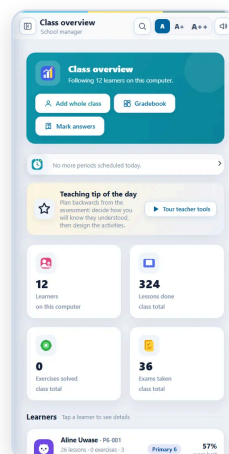

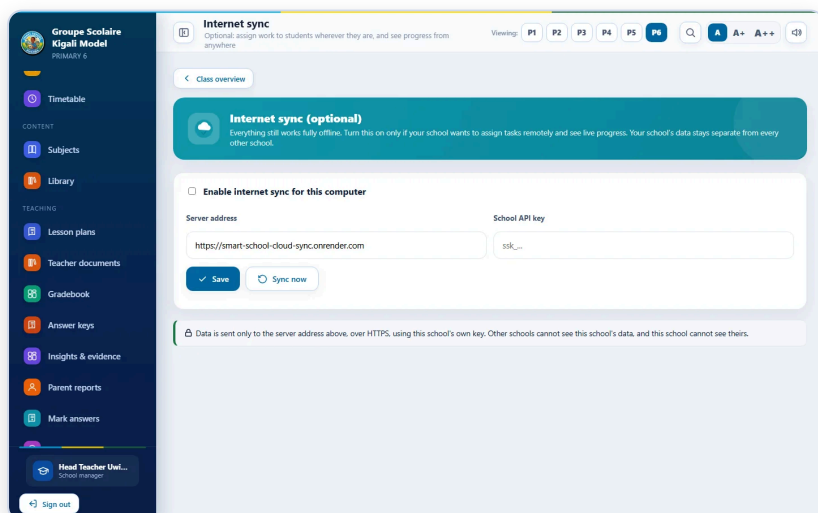

- Windows and Android share one school record
- Work from any device is merged, not overwritten
- Works again after a lost connection

Easy joining

- Join a device with a one time code
- Codes expire and can be limited
- A manager can remove a device at any time

Clock safe

- Devices with a wrong clock cannot overwrite newer work
- Sync status is shown in plain words
- Automatic retry

Your school stays in control

Privacy and safety

- Sync is optional and off until a manager turns it on
- Each device holds its own key
- Learner data is never sold

Licences and support

- Clear licence dates and a grace period
- Apps keep working offline if a licence ends
- Support desk with a full audit trail

For partners

- Read only dashboards for district officers and funders
- School groups and programmes
- No access to individual learner records

Reliability

- Live status page
- Automatic error reports that hide personal details
- Backups by the hosting provider

How to start

1. Request access and we create your school account.
2. A manager makes a join code in the app.
3. Type the code on each device and press Sync now.

Smart School Cloud is optional and is rolled out school by school.
